

III EUFRIN Peach and Apricot WG Meeting Ctifl, Balandran (France) 4 -5 June 2018

CTIFL Centre of Balandran
751 Chemin de Balandran
30 127 BELLEGARDE (France)

Objective

The EUFRIN Apricot & Peach (A&P WG) meets every 2 years. Its general aim is to create a dynamic at European scale among the different partners involved in it.

Since its creation, the A&P WG embarked on an initiative aiming to implement a collaborative varietal evaluation system in Europe. In 2016, a panel of experts of peach variety testing agreed on a provisional list of descriptors to assess variety performance. In 2017, the A&P WG agreed on a list of 17 reference Cvs, recently distributed to 11 experimental sites scattered in Southern Europe.

The meeting will permit, after a focus on the context and the definition of the objectives of the Network, to work on the validation of common protocol, considering the different cultivar assessment criteria.
